

Processing:

Cutting	
Long stripping	
Partial stripping	
Crimping	
Seal insertion	
Doubling unit	
Sleeve insertion	
Twisting and tinnig	
Inkjet printing	
Hot printing	
Split cycle for close barrel	
Intermediate stripping	

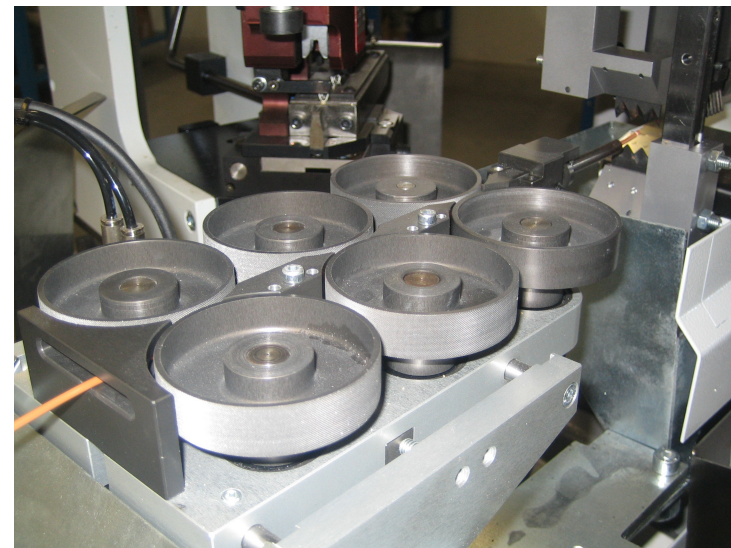

AM300 quattro is the ultimate expression of technology combined with Italian design. It is proposed as automatic cutting and stripping and crimping machine that can be equipped with up to five stations. It's projected for processing very small wire cross sections and very short wire lenght. Presents itself as machine as very simply and easy to use.

Technical data:

Cross section: 013 – 2,5mmq
 Wire lenght min: 15mm strip both side 2mm
 25mm crimp side 1
 34mm crimp both side
 Strp lenght: 0,1 – 40mm side 1
 0,1 – 20mm side 2
 Feeder speed: 8m/s
 Power supply: 400V 50/60Hz 5kVA
 Air supply: 6-7bar
 Weight: 1100Kg
 Noise: 75dB (without crimping press)
 Dimensions: L3000 x L1400 x H2000 mm

Feeder in the advanced position close to the cutting head, for the processing of very small section of cable.
