Two-Post Die Loose terminals

Specifications

ID
MSEES

DESCRIPTION
Two-post die with manual feeding slide

CRIMPING HEIGHT
190/272 mm (7.48/8.346")

STROKE
50/40 mm (1.968/1.575")

TERMINAL THICKNESS
above 1.5 mm (0.059")

WIRE SECTION
up to 75 mm² (3/0 AWG)

FEEDING SYSTEM
manual

WEIGHT
13.6 Kg (29.9 lb)

DIMENSION (mm)
W (without carter) 170 x H 210 x D 200

DIMENSION (")
W 6.69 (without carter) x H 8.26 x D 7.87

Two-post crimping die for big loose terminals with thickness > 1.5mm and wire section up to 75mm². Continuous crimping height adjusting system. The terminal is loaded by means of a manually operated slide, fitted with a sensor that allows the press to cycle only when the slide has reached its stroke's end. All the wearing parts can be replaced without removing the applicator from the press. Can be fitted to any crimping press having a crimping height (measured from the die mounting plate to the press coupling when at Bottom Dead Center) of 212mm (see Mecal Press P104) or 190mm (see Mecal Press P150 and P200). It is supplied with a complete technical documentation containing all the information needed to safely use and correctly maintain the equipment. Upon request, a capability study (including a picture of a sectioned crimped terminal) can be performed. Cycle counter non available.

Produced under a quality Management System certified to ISO 9001 and 14001 (TÜV).

Specifications subject to change. Consult Mecal S.r.l. for latest specifications.
